

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

ATTY. DOCKET NO. 026083/0138

In re Patent Application of

Hans Ulrich Stilz, *et al.*

Serial No. 08/971,960

Group Art Unit: 1616

Filed: November 17, 1997

Examiner: S. Qazi

For: 5-MEMBERED RING HETEROCYCLES AS INHIBITORS OF  
LEUCOCYTE ADHESION AND AS VLA-4 ANTAGONISTS

AMENDMENT AND REQUEST FOR  
RECONSIDERATION UNDER 37 C.F.R. 1.111

Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

The following is a response to the outstanding Office Action mailed on  
September 25, 1998:

IN THE CLAIMS

In claim 1, line 5 (counting the formula as one line), change "R<sup>1</sup>-A-C(R<sup>13</sup>)"  
to -- R<sup>1</sup>-A-C(R<sup>13</sup>) < -- and change R<sup>1</sup>-A-CH=C<sup>2</sup> to -- R<sup>1</sup>-A-CH=C < --.

REMARKS

Claims 1-38 are pending. Claim 1 has been amended to clarify that the  
only possible carbon atoms with open valences are the carbons in the definition of  
W that are part of the ring, as suggested by the Examiner. No new matter has  
been introduced.

In view of the above amendments and following remarks, favorable  
reconsideration of this application is courteously solicited.

Applicants affirm the provisional election with traverse of the species of  
example 53. Applicants appreciate the Examiner's expansion of the search beyond  
the elected compound to cover the portion of the genus considered to be a  
"reasonable" expansion of the search. However, the restriction is still traversed
